## Carter: Arms will pass Congress

CRANSTON, Rhode Island, Feb. 17 (R). — Fresident Carter said today he believed Congress would support his plan to sell war planes to Egypt, Saudi Arabia and Israel. At a televised press conference at the start of a New England speaking tour, Mr. Carter defended the proposal to sell 50 F-5E planes to Egypt, describing Egypt as one of America's "staunchest allies." The F-5E's proposed for Egypt, ware not nearly as advanced on the posed for Egypt were not nearly as advanced as the planes earmarked for Israel, he said. The semi-official Cairo newspaper Al Ahram reported today that War Minister General Mohammad Abdel Ghani Gamassi would visit Washington soon to discuss Egypt's war needs.

Topic of discussion at science conference

# Selectivity and adaptation are keys to productive transfer of technology

this second and concluding article of our series, the hind the question of transferring technology from he industrial states to developing countries such as rdan, a topic that will figure prominently in the at opens here this morning. On page 3, in another ticle, we examine the background to the conference.

By Jenab Tutunji

\*\*\* \*\* Getal to the Jordan Times

ine of the fundamental iss that a national science technology policy will have leal with is the transfer of mology from the developed astrial nations to the deveand many countries. The transfer Win sechnology is an ongoing prss, whether we like it or not. results have not always n desirable.

he know-bow or technology be transmitted through a nce or patent, a manual a production specifications. orted machinery, or a faclayout, or such technology , be embodied in intermedior capital goods imported o abroad or passed on in process of the training of sonnel from the developing

nported technology may brmas country. Certain proes or machines may embengineering criteria with ult constraints, such as a ur-capital ratio that is unrable for a country with illidant labour but that is

t on capital. or instance, as one of the ers to be read at the connce will point out, it is es-"ited that if Ethiopia wanto equip its labour force to per cent of the Ethiopian ur force would be emplo-To attempt to match the e standards that Britain afford, while maintaining employment, would require pital outlay amounting to mes Ethiopia's entire Gross

estic Product. rdan, as it turns out, is beoff than Ethiopia, but example serves to highlight oblem that Jordan and all r developing countries face.

dustrial product or process will not function satisfactor-ily under local conditions. For instance, adhesives imported by local manufacturers of hard boxes proved unsuitable to Jordan's climatic conditions. The local polymers factory (which manufactures petroderivatives such as paints and adhesives

dustries) was able, with the technical assistance of the Royal Scientific Society, to produce an adhesive suitable to Jordan's climate. Jordan imports "packages of technology" in terms of "turn-key projects", as in the construction of roads, dams or sch-ools, and our industry depends on imported machines and technological processes which are transplanted lock, stock and barrel from industrialised co-

untries, according to Dr. Bas-

sam Saket, Director of the Economics Research Department

used as an input in other in-

at the Royal Scientific Soci-So far, little thought and effort have gone into adapting machines or processes designed by and for the developed nations to suit the needs of this country. This state of affairs usually prevails in developing countries due to the absence of an indigenous capability for

adaptation through a fund of

local know-how.

At a certain stage of development, developing countries grappling with balance of payments difficulties establish import-substituting industries.

Due to the absence of a local technological base, this usually involves final product import substitution, i.e., such industries are based on the transformation of intermediate or capital goods products purchased from the sellers of technology in industrialised countries into finished products for whometimes an imported in- ich there is a demand in the

For instance, the Jordanian batteries manufacturing company and the local pharmaceuti-cals firm are of this nature. The local pharmaceuticals industry basically imports drugs from abroad, puts them in tablet or capsule form, and bottles and packages the rinal pr-

oduct, using machines imported from abroad to do so.

The value added locally and the technology filtering into the economy are quite limited. It is only recently that the pharmaceuticals industry has atarted units to do research. To the credit of this industry it is not only import substituting but has become export-oriented. not due to technological innovations but sound business practices, having taken advantage of protective governmental tari-ffs to establish itself; it now produces products that are competitive in quality and price on the world market. Most import-substituting industries in

Jordan are not as fortunate. A good deal of Jordan's industry nevertheless depends on import substitution, according to Dr. Saket.

Dr. Jawad Anani, Under-Secretary of the Ministry of La-bour and previously besd of the economics research dep-artment of the Central Bank, says most industrial concerns in Jordan operate under franchises from firms abroad, and. have only survived under import-substitutioo protection.

Private enterprise in the de-

veloping-countries gravitates towards this sort of industry, motivated by quick profits, ease of operation and the small nature of risk involved, Dr. Saket explains. "It is easier to adapt your-

self to a foreign technology and accept its constraints than to modify it," Dr. Anani observes. Protective traiff walls shield such industries from foreign competition.

'Private industries in Jordan are of two kinds," Dr. Anani remarks. "Some firms rely heavily on governmental protection and the monopolistic situation made available to tariff wathem through Ils. This is not conducive to better quality at lower prices.

Such industries are not intereated in technological innovations. It is competition that pr ovides a beneficial environme

nt for such innovations." On the other hand, there are industries motivated by a proper entrepreneurial spirit which have reached the point where they do not need the tariff walls, such as the polymers and pharmaceuticals firms.

#### An inter-industry relationship

Dr. Anani suggests that a more viable and more advanced industrial base can be created in Jordan.

He suggests that Jordan starts its own industrial base utilising available resources in the country, taking into account operative constraints and circumstances.

Dr. Anani feels that it is imperative to create a system "forward and backward linkages", largely absent at present, where the output of one industry will be used by other industries as their raw material or intermediate products mputs.

Output must be adapted to meet needs of other sections of local industry, and inputs must be adapted to utilise available resources. As Jordanian industry attempts this, it will run into bottlenecks whwill require the adaption industrial processes or existiog machinery to local oe-

eds and circumstances. This will require indigenous technological innovations; in other words, we will have to make our own innovations that will enable the country to devise technological packages wh ich can be instrumental in the creation and growth of an indigenous industry.

We want to create an interindustry relationship where there is demand by one industry for the products of the other, and this is where adaptation of technology can find breathing space. Once we have established an inter-industry line then we can determine what our technological needs are," Dr. Anani explains.

## Special Dayan back in Israel, U.S. envoy expects military has talks talks renewed

in Addis

### **Ababa**

WASHINGTON, Feb. 17 (R).—A special envoy from President Carter met Ethlopia's Marxist military ruler in Addis Ababa today as the United States reported a continuing Cuban buildup in support of Ethiopian

forces battling on two fronts.
Mr. David Aaron, the President's Deputy Assistant for National Security, conferred with Licut. Col. Mengistu Haile Mariam in the wake of a warning by Mr. Carter that any crossing of Somalia's borders by Ethiopian troops would be viewed by America as a serious thr-

eat to world peace.

The U.S. State Department said Cuba had an estimated. 5,000 military advisers in Ethiopia and was sending more to help in the struggle against Eritrean independence forces as well as Somali forces fighting over the Ogaden Desert region. This was an increase of 2,000

over the Cuban figure given last week by Secretary of State Cyrus Vance. The State Department also reported that about 1,000 Soviet advisers were still in Ethlopia, In an interview with a gro-

up of editors yesterday and re-leased for publication today Mr. Carter reaffirmed the U.S. refusal to supply arms to either country as Ethiopian troops pushed Somali forces in the Ogaden Desert. "We have called on Somalia

to withdraw from Ethiopian territory out of the Ogaden area..." Mr. Carter said. Mr. Aaron's mission was por-

trayed by U.S. officials as a further effort to promote a peace settlement in the Ethiopia-Somalia conflict and to gain a better understanding of Ethiopian views. Addis Ababa radio reported

that in a speech to the U.S. visitors, Col. Mengistu repeatedly reaffirmed that for peace to be restored to the Horn of Africa the reactionary Somali goverament's invading troops would have to be withdrawn from Ethiopian territory immediately."

Meanwhile in Rabat today, the Secretary General of the Western Somalia Liberation Front (WSLF), Mr. Abdullah Hassan Mahmoud said that Arab volunteers are not needed by Somali forces fighting

Ethiopian troops in the Ogaden. But Mr. Mahmoud, on a tour of Libya told a news conference he hoped Arab states would contribute arms, financial aid, medical supplies and food to the Somali forces.

TEL AVIV, Feb. 17 (Agencies). — Israel's Foreign Minister Moshe Dayan returned home tonight from a 10-day tour of the United States during which he sought to muster official and public support for Prime Minister Menachem Begin's policies.

Mr. Dayan made no statement on arrival but he told Israel Radlo in an interview during the flight that Israel took a very grim-view of recent actions by the Carter administra-

tion.
The foreign minister cited the U.S. administration's decision to sell warplanes to Egypt and Saudi Arahia and its attitudes towards Israeli settlements in the Sinai desert and withdrawal from occupied Arab

territory.
M. Dayan said U.S. Assistant Secretary of State Alfred Atherton's return to the region next week marked a new phase in Israeli-Egyptian peace nego-tlations. He sald he thought the military talks between the two countries would also be renew-

Defence Minister Ezer Weizman binted tonight that President Carter's plan to sell warplanes to Egypt and Saudi Arabla would force Israel to harden its position in peace talks with Cairo. Interviewed on Israel televi-

slon, he said the move to sell 50 F-5E jet fighters to Egypt and 60 F-15 fighters to Saudi Arabia was a "bad tactical move by Washington which will have repercussions on our talks with the Egyptians."

## Carter starts New England speaking tour

WASHINGTON, Feb. 17 (R).

— President Carter sets out today on a campaign-style speaking tour in New England to test his popularity as Americans ponder controversial decisions on the Middle East, the Panama Canal issue an domestic questions.

The trip to three states will last only 24 hours but involve four major appearances by Mr. Carter in support of his poli-cies, some of which are attack in Congress. Public opinion polls report

his popularity bas slipped considerably in recent months. Polls say many Americans neither approve nor disapprove his record, indicating that voters are baffled and do not really understand the man they elected president 15 months ago. For Mr. Carter, the two-day

speaking tour will be an opportunity to sound out reaction to his new Middle East arms package - - the proposed sale of warplanes to Egypt and Saudi Arabia as well as to Israel -which has angered the Israelis and disturbed powerful congre-

Other goals are to rally public opinion behind his energy policy, now languishing in Congress, and controversial treaties calling for the transfer of control of the Panama Canal to Panama in the year 2000.

Carter in the Oval Office of the White House Thursday.

Mr. Weizman reported that the army was studying the strategic problem which would be posed by the acquisition of mo-dern U.S. aircraft by its Arab

He said one Issue to be reconsidered was the future of military air fields in Sinai which Prime Minister Begin is prepared to evacuate.

Prime Minister Begin has come under sharp attack from his predecessor Yitzhak Rabin, who accused him of "childish" diplomacy and failure to understand U.S. policy.

The former prime minister also accused the government of setting up Jewish settlements in occupied Arab lands "in disguise" by attaching them to tions." He was referring in pa- pills to the public.

# Haldeman: Nixon saved the world

#### NEW YORK, Feb. 17 (R). -Former White House Chief of Staff H.R. "Bob" Haldeman. who once called himself Richard Nixon's robot, has accused him of instigating the Waed the settlement agreement tergate break-in which led to as the "biggest sell-out in the the president's disgrace and unhistory of Africa" and vowed precedented resignation.

Mr. Haldeman, jailed for his part in the scandal, also says in his book. "The Ends of Power," that Mr. Nixon was deeply involved from the start in the cover-up of the burglary at the Democratic Party headquarters in Washington's

Watergate complex in 1972. In excerpts from the book released yesterday. Mr. Haldeman portrays Mr. Nixon as a potentially great statesman who twice saved the world from nu-

clear disaster. But he says the formar president, who resigned in 1974

neither he nor the president knew about the break-in. Mr. Haldeman also claims

that Mr. Nixon instituted the taping of conversations in his own White House office in order to keep Secretary of State Henry Kissinger honest. He said that within the Wh-

ite House, Dr. Kissinger was "he hawk of hawks" and outside he vas a dove, pretending that N. Nixon was the one making the unpopular decisions. Mr. Haloeman also claims that m :269, the Soviet Union moved 1,800 nuclear-tipped missiles within three kms. of its Ussuri River border with China and made overtures for the U.S. to join it in a nuclear

in 1970.

The Soviet news agency TASS today rejected as "a lie from beginning to end" claims by Mr. E. 'deman that it had planned a nuclear strike on Chins. The Kremlin agency made no

reference to another claim in Haldeman's book that President Nixon forced the Soviet Union to back down from building a naval base in Cubs in 1970.

## Two hands clap better than one

The national science and technology policy conference that opens here today gives us cause for both hope and concern. It evokes hope because it is the kind of meeting that can do much to advance the processes of social and economic development in Jordan, particularly in view of the diligent advance preparation that has been done, and also in view of the rather heavyweight array of local and foreign participants in the conference.

But the event also causes us some concern, because we have seen too many cases in the past when large and impressive meetings were poorly followed up. In this case, the conference is sure to be a valuable forum for an exchange of ideas and for the formulation of a more or less complete and cohesive national science and research policy. As the Director-General of the Royal Scientific Society, Dr. Albert Butros, has said, Jordan is particularly conducive to this sort of coordinated approach on a national level because of the manageable scale of things in this country.

What we shall be particularly eager to see is a meaningful mechanism by which the work of the conference this week is properly followed up and its recommendations implemented. What this will require is some sort of loose coordinating body under the aegis of the national government, to provide the allimportant administrative structure, but what is probably more important -- indeed, decisive -- in this case is a coherent response from the private sector in Jordan, especially in the transfer of technology in the industrial and commercial sectors of the economy, where the private sector of Jordan has taken advantage of the free-enterprise atmosphere fostered by the government, without, one thinks, playing its own full role in planning and coordinating with the pertinent state authorities.

Thus we suggest that the real onus of success in this area lies more with the private sector than with the government. The state has done its part in organising this conference. It should now challenge the private sector in a clear and dynamic manner to do its part of the job.

## ARAB PRESS COMMENTARY

AL RA'I and AL DUSTOUR Friday took up two focal points in the current Middle East crisis for their commen Al Ra'l thinks that Israel has foolishly decided to open a

large-scale diplomatic offensive against President Jimmy Carter's administration through the two points of difference between Washington and Tel Aviv on settlements and armament. The Israeli newspapers charge that the U.S. wants to create

a situation whereby Israel would be unable to score a decisive victory over the Arabs, in the event of renewed fighting in the Middle East.

Israel, Al Ra'i says, only thinks in terms of war. Its determined insistance to go ahead with creating settlements, despite the world community's will, clearly means construction of advanced bases for its striking forces, in preparation for the zero hour...
Al Dustour questions the credibility of Mr. Begin's declaration

Thursday that be welcomes the reconvening of the Geneva Middle East peace conference...

"Does Mr. Begin's call," Al Dustour asks, "mean that Israel wants to shelve its discussions with Egypt and instead prefers to go to Geneva?" And if it is so, what will be Israel's position regarding its opposition to the participation of Palestinians in the conference, and its avowed suspicion of the Soviet Union's role as a co-chairman of the Geneva conference?, the newspaper agains asks.

## BUSINESS GRAPEVINE compiled and edited by John Bonar

With a planned need to acquire new aircraft in the early 1980's Alia, the Royal Jordanian Airline, is keeping all its options open. Although executives of the airline have seen the Lockheed Tristar, the DC10 and of course the Boeing 747 which is already in service with Alia, Chairman Ali Ghan-

with Alia, Chairman Ali Ghandour is keeping more than half an eye open on the new techtoology and new aircraft that are being developed and could be it production by the time Alia is ready to purchase.

If the U.S. Boeing has what it calls its New Airplane. Programme, formerly variously known as 7X7, 7S7, 7S7 and 757, involving initially a twin engined 180-200 seater capable of being developed into a wider family of jets.

ome orders but has plans also for a larger aircraft, the 200 seat DC-X-200

er family of jets.
| McDounel Douglas has already begun work on its latest derivative of the DC-9, the Su-per 80 series and has collected

In Europe there is a variety of ideas but no practical programme as yet. British Aerospace has in own plan for a twin engined called the X-Eleven. In France Aerospatiale has

**Keeping options open** a broadly comparable plan for the AS-200. Both thewith Messerchmitt and Fokker-VFW have been trying to find

a common solution but have still to sort out the problems. Meanwhile Alia has changed its mind at the last minute on its own fleet. Plans to sell off the airline's remaining 720B have been cancelled. Instead it will be overhauled and refurbished for longer life, greater safety and efficiency. The 707 which was until recently being used as an all cargo freighter a common solution but have used as an all cargo freighter is to be converted to a passenger aircraft to serve as a back up plane and to help out during the busy Haj season.

Earlier plans had been to lease a Boeing 727 from Tunis Air but this was abandoned be-

cause it was insufficient to meet operating requirements. The conversion of the 707 to passenger service means that Alla now has no all-cargo aircraft. The bulk of Alia's freight operations now revolve around the 747 combi which carries a substantial amount of freight as well as passengers. The twi-ce weekly jumbo jet service out of New York to Amman is carrying about 150,000 pounds

Cargo includes oil machinery,

vehicle parts, lubricants, hos-pital supplies, pharmaceuticals, chemicals, tobacco, frozen meat

and most recently four small Alia is promoting the service in the U.S. as a regional servi-ce with back up trucking ope-rations to other Middle East. states. According to Alla cargo sales manager for North Ame-rica Peter Sumner, "The final leg by trucks, arranged by Alia, is speedier that by local re-gional flights because the trucks clear customs at highway border stations quicker than they would by air where a large backlog of goods awaits clearance through clogged airport Alia's new cargo handling equi-

Soviet Union has been co-ch-

proach to a solution.

Soviet-American statement th-

nce. And the Administration

thought it would he clever to

let the Russians produce the

initial draft. Vance unveiled

the document on Oct. 1, and

Carter proclaimed it "an ach-

ievement of unprecedented si-

gnificance." But the reaction shook them both.

Begin called the statement "unacceptable." The Israelis

were exercised by a referen-

ce to the Palestinians' "legit-

imate rights" and by the ah-

sence of any reference to "se-

cure borders" for Israel, and

they denounced the Administ-

ration for bringing the Soviet Union back to the Middle Ea-

st scene. American Jews re-acted just as harshly. More

than 8,000 telephooe calls, te-

legrams and letters of prote-

st poured into the White Ho-

use. And there were recrimi-

nations within the Administra-

tion itself. A member of the

White House political staff

blamed Brzezinski, saying he

was blind to the domestic di-

mensions of the problem; a

member of Brzezinski's staff

blamed the State Department's

"politically insensitive" Midd-

le East experts: a senior State

Department official biamed the

White House political staff,

saying it was failing to coord-

inate domestic and foreign po-

licy. "The organisation is lo-usy," be said. "You've got th-

ree people close to the Presi-

dent, and after that the who-

le thing disiotegrates."

Carter hastily sought to repair the damage. Revamping

his scheduled address before

the United Nations, he spoke

of Israel's need for "recogni-sed and secure" borders, and

he relterated the "unquestioo-

able" American commitment

to Israel's security. Meeting in

New York with Dayan, he ag-

reed that Israel would not be

bound by the Soviet-American

declaration or compelled to

negotiate at Geneva with the

PLO. Returning to Washington, be convened a White Ho-

use meeting with 27 members

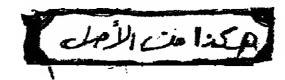

of the House of Representati-

ves, oearly all of them Jewish,

## Turkey shuts railway entry into Syria

ANKARA, Feb. 17 (R). - Turkey has closed one of its three through its territory, railway officials said here today.

The 82 kms. section of the Turkey-Iraq line which goes through Syria has been blocked since Nov. 16, for what Syrian

therities described as security reasons. In retaliation, the Turkish Railway Company closed th at Nusaybin, the southeast entry point, on Jan. 25, after Turkey reached an agreement with Iraq, the officials said. The other two entries into Syria - - at Islahiye and Meyda niekber - - were kept open. .

According to the agreement, Turkey would keep the line closed until Syria reopened the section in its territory and allowed about 1,000 Turkish railway trucks bound for Iraq through. The goods were being transported by lorries from Nasaybin to Baghdad, the officials added.

## M.J.S. miners, pit owners bargain under ressure from Carter, threat of chaos

VASHINGTON, Feb. 17 (R). finers and pit owners bargaind into the early hours today an effort to end the lon-est coal strike in U.S. his.ov. under pressure from Presl-lent Carter who said it threa-ened the nation with econo-

nic chaos. The walk-out by 160,000 miers began 74 days ago. It has aused major electricity cuts n some states, hit Industrial roduction and threatened milions of lay-offs.

Mr. Carter saw governors of 2 badly-affected states last ni-

Cairo late last year when President Anwar Sadat began his controversial peace initiative. Other delegations to leave

the federation, for various reasons, were Egypt, Sudan, Somalia and Mauritania. The Egyptian delegation withdrew during Monday's first se-

> Middle East peace policies were under attack. In an opening speech by Ku-wait Labour Federation Presi-

ssion when President Sadat's

dent Nasser Al Faraj, who officials said was last night elec-ted the new IFATU president. Mr. Hamar Jalloud of the Libyan Jamahiriyah was elected secretary general in place of Iraq's Ali Abdul Mawla who withdrew with the Iraqi delegation yesterday.

The Somali delegation withdrew in protest against the conference's refusal to discuss the situation of Africa, wbere Somalia is locked in armed conflict with Ethiopia.

The Sudanese and Mauritanian delegations withdrew in protest against the "dismemberment" of the federation, IF-ATU sources said.

The conference is believed to have adopted a series of political resolutions but these have not yet been released.

#### Kuwait. UAE. Qatar have highest average capita per incomes

WASHINGTON, Feb. 17 (R). - Three of the world's smallest countries -- Kuwaii, the United Arab Emirates and Oatar -- have the highest average incomes per person, the World Bank sald here yester-

The small populations of the three sheikhdoms, combined with their tremendous oil wealth, resulted in a per capita gross national product of over \$14,000 in Kuwait \$13,990 ln the UAE and \$11,400 in Qatar. By contrast, Bhutan, the ti-

ny Hinialayan kingdom surrounded by India and Tibet, was the world's poorest country with a per capita gross national of only \$70.

The figures are contained in the World Bank's Atlas, an annual publication which measures income, output and world populations.

It shows that the richest of the lodustrial councries, Swe-den, had an income of \$5,670 per head in 1976, followed by the United States at \$7,890 and West Germany with \$7,350. The U.S. economy was by far the world's largest in 1976, totalling almost \$1,700 billion or more than double that of ne next country, the Union, at \$708 billion. Europe, including the Soviet Union, remains the world's richest continent with only two countries -- Albania and Turkey -- having gross national products of less than \$1,400 per bead.

In contrast, most of Africa and Asia continue to live in poverty with only a hand-ful of countries on both continents having an income of more than \$1,000.

Africa's poorest countries, with an annual income per head of only \$100, are Ethio-pia and Mali.

Japan is the richest non-oil producing nation in Asia, with an annual income of \$4,910 a head, which contrasts sharply with Bangladesb's \$110, India's \$150 and Chine's \$410.

Honduras and Bolivia are the poorest countries in the Americas, with an annual per ca-pita income of only \$390, closely followed by the tiny "sp-lce islaod" of Grenada in the Caribbean with \$420.

on of Adolf Hitler.
At a New York dinner for Golda Meir, with whom he had clashed in the past, Henry Kissinger meanwhile added to Carter's discomfort by delivering a broadside at the Administration's Middle East policy. Israel could not afford "trial and error" diplomacy. he said, and he decried the invitation to the Russians, opposed the idea of a Palestinian state, and questioned the value of a Geneva conference conceived 'in an atmosphere self-imposed deadlines.' But Brzezinski was unfazed. "Don't forget," he said to me, "the kind of criticism Kissinger faced. Many of the thirgs that are now being said about us -- more specifically about me -- were said about him. Today, he is revered hy the Jewish community for baving strengthened Israel's security. I hope that, three years from now, some people will also say that what we are doing, that the kind of security we bave created for Iswill prove more durable than that woo by repeated

#### TOTALLY CAUGHT BY SURPRISE'

On Nov. 9, Anwar Sadat made a rambling speech before the Egyptian legislature. Almost casually, he remarked that his desire for peace was so strong that he was "ready to go to the Israell Parliament itself and discuss it." That, as every television viewer knows, was the beginning of a new Middle East ball game. What had prompted Sadat's

As far back as April, during his visit to Washington, he had voiced misgivings about Carter's push for a Geneva conference. Uoless such a forum were well prepared in advance, he believed, he feared that Egypt'a interests might be bogged down by Syrian and Palestinian demands. By the fall, he was also wor-ried by the U.S. decision to bring the Soviet Union into the picture -- not so much because he distrusted the Russians as hecause he estimated that the thunderous criticism that had swelled against the Administration in the United States was weakening Carter's diplomatic leverage in the Middle East. He had become increasingly annoyed as well by Syrian President Hafez Assad's apparent lack of warmth for negotiations, and his impatience was strained. too, by a quibbling over pro-cedures. In addition, Sadat felt himself to be under beavy pressure from Egypt's faltering economy. He needed pea-ce -- and he needed it qui-

In September, a special American envoy had handed Sa-dat a handwritten letter, sealed in wax, from Carter. It urged Sadat to make a daring gesture that would put derailed Middle East negotiations back on track. Sadat replied, alsn in his own bandwriting, with the improbable notion of a "supersumm-It," to be held in Jerusalem and attended by the American, Soviet, Chinese, British and French chiefs of state. The scheme evoked no entbusiasm in Washington. But Carter's appeal for boldness had planted the seed of an idea in Sadat's mind, and it germinated into his bistoric voyage to Israel. Recently, looking back on the events, a White House official said: "We were expecting him to do something

big, but not that big. We were totally caught by surprise." Yet, as Carter and his aides watched Sadat prepare for his trip to Jerusalem, their jitters were obvious. They feared that Sadat might make a separate deal with Israel that would infuriate the other Arab nations and shatter the Geneva concept, the pillar of the American strategy. They were troubled by the Kremlin's opposition to Sadat's initiative, considering their hopes for Soviet help. And their pride was bruised as Walter Cronkite seemed to usurp their mediator's role, relegating them to the function of travel agent. Carter had no choice but to hail Sadat's move as "courageous," hut his Middle

East experts expressed reservations over what looked to them like a high-risk endea-

Jimmy Carter's long Middle East ordeal

In late November, Sadat jarred the Administration again by proposing a preliminary meeting in Cairo to precede the Geneva conference. The hazard was that the Cairo conclave, if it were attended on-ly by Israel and Egypt, would confirm Arab suspicions of a separate peace and hinder an overall solution. But Sadat convened a Cairo meeting anyway, warning that he might make a deal with Isif others stayed awey. and the Administration was forced to go along.

Brzezinski announced ingenious new strategy of "concentric circles." under which an Egyptian-Israeli arrangement would be enlarged into a West Bank accord among Israel, Jordan and the more moderate Palestinians, all this to be followed by an Israeli-Syrian settlement, and the whole package to be sealed, with American and Soviet as-sent, at an eventual Geneva forum. What it looked like was Kissinger's step-by-step diplomacy, hurriedly disinter-

As the Cairo meeting approached, Carter fretted with his advisers over the diplomatic level of the American delegation. Would the Russians and some of the Arabs attend if representatives were held down to ambassadorial rank? Moscow, Syria and the others said nn. In Cairo, an Egyptlan official accused the Americans of schlzophrenia. "They are afraid of the Sadat initiative," he told a correspondent. but they want to control it. They are worried about not knowing what is coming next, but they want to claim credit for any success." By early December, the Ad-

ministration was set on a new course. It had raised the prestige of the Cairo talks -which Carter had now pronounced "very constructive" -by naming a delegation beaded by Alfred (Roy) Atherton, the bead of the State Department's Middle East section. It had pleaded with Sadat to make only "open-ended" arrangements and with Israel to be "courageous" in making concessions to the cause of peace, and it had urged Syria to cooperate lo any ultimate accord. The situation had changed so drastically that Carter's original Middle East program -seemed to - have been inscribed in sand.

#### **BEGIN IGNORES** U.S. SUGGESTIONS

The Soviet Union, denouncing Sadat's initiative as a plot to .thwart the Geneva confereoce, bad in the words of one American official, "excluded itself from the game." The Administration, after antagon-izing both Israelis and American Jews by inviting the PLO into the negotiations, re-versed itself and warned the PLO that it might lose Its diplomatic mandate by boycotting the Cairo talks. Privately, Administration officials appeared to be retreating from their former insistence on comprehensive approach.

When Begin flew into Washington in mid-December to present Carter with the position be planned to adopt at the Cairo meeting, he met wi-th strong objections from Administration specialists. They advised him to emphasize that a "transitional" plan that co-uld be revamped. They urged him to deal in generalities rather than specifics that Sadat could not accept, and they explained the reasons for their concern. The pointed out, for example, that Sadat could not agree to a continued Israeli military presence on the West Bank of the Jordan River, a presence which meant in effect that Israel's occupation of the territory would go on. Nor could they see Sadat conceding to Begin's insistence on an Israeli veto over lmmigration into the area, which would preclude its emergence as a Palestinian bomeland. Besides, they could not quite understand bow Begin and Sadat could come tn terms oo an issue that mainly pre-

be was not outlining a final accord but merely delineating

occupied Jordan, and they recommended to the Israeli Prime Minister that he consult with Jordan in secret, if necessary. But Begin sidestepped any promise to follow this counsel, saying only that he would take the Administration's suggestions "into consideration." As it turned out, he ignored them. Striving to accentuate the

positive, Carter sought to put a good face on the Begin plan, even though it had disappointed him As a consequen-ce, he irritated Sadat, and like a fireman, he rushed to Egypt to extinguish the Egyptian leader's smoldering hostility. And there he seemed to side with Sadat by supporting the concept of Palestinian self-determination. But this vexed Begin who said. "To us. self-determination means a Palestinian state and we are not going to agree to any such mortal danger to Israel" Me-anwhile, Jordan and Saudi Arabia weighed in with reservations of their own. Geneva seemed to be as far away Mars.

Carter had been correct in one observation, His diplomatic effort in the Middle East had been as complicated, thankless and frustrating as any in bistory. He had, to his credit, given the problem the prlority it deserved, and had thus eased the tensions that threatened to propel the regioo -- and perhaps the world - toward war. But the dangers ahead still persist, and Jimmy Carter ought to have learned from the twists and turns of the past year that, whatever the degree of his devotion to the quest for peace, his own reputation may be the first casualty of ano-

#### LONDON MARKET REPORT

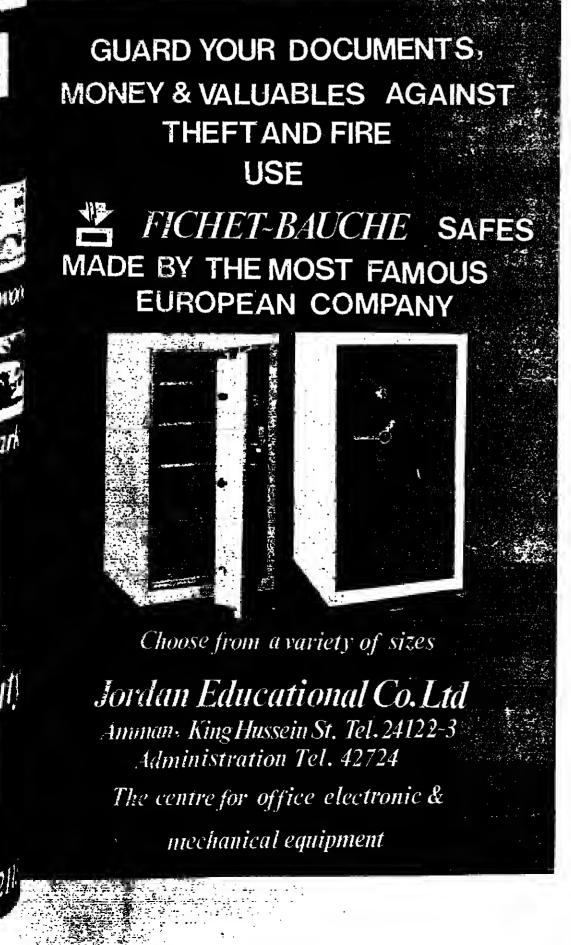

Government bonds closed mixed while equities firmed slightly Friday in light pre-weekend trading, dealers said. At 15:00 hrs the F.T. index was ap 3.7 at 458.7.

Lond dated government bonds reversed initial falls to show net gains ranging to 1/4 following news of a modest rise in U.K. January retail prices. Shorts were depressed by speculation over the possibility of a new short 'tap' issue and they closed steady to

Equities were barely tested and firmed where changed, while gold shares advanced narrowly. U.S. issues were mixed and some Canadian shares eased.

Courtaulds, Bowater, Fisons, ICI, Beecham and Unilever rose between 3p and 8p while other industrials showed smaller rises. Oll shares closed steady to harrowly mixed. Stores advanced and properties and insurances firmed where changed. Lloyds rose 4p following final results. Midland and National Westminster gained 1p and 4p respectively while Barclays was

Price of gold closed in London Friday at \$179.45/ez.

# Selectivity and adaptation are keys to productive transfer of technology

(Continued from page 1)

Bottlenecks are met by technological innovations and re-

Technology cannot always be imported and used as it is. Technology is not that rational and it often has to be adapted, Dr. Anani adds. Adapta-tion requires research.

This is the line we should pursue. Nor do we have to devise entire packages at one time; technology is divisible, it can be parcelled -- it is not a question of either you have the knack or you don't," he

Jordan must nevertheless be-

ware in the pursuit of industrial development against neglecting other vital sectors of the economy, such as agriculture. Industry all too often takes on an over-privileged position in developing countries at the expense of the agricultural and related sectors which are starved of funds, leading to onesided development and creating economic and social problems. This is a question of priorities, and forms an integral part of science and technology policy. It is handled in detail in the priorities determination study which will be presented at tha conference.

#### Problems with importing

Another problem with industrialisation through final product import substitution is that it does not reduce, in fact often increases, dependence on imported technology, Quite often there is a contractual agreement to purchase intermediate products or capital goods. At other times, the nature of the operation (for example, if one

is assembling cars) constrains the manufacturer to purchase or import components of a specific nature (e.g. car parts) over which the licensing company in the developed nation enjo-

ys a monopoly, For instance, a study of the pharmaceutical industry in Columbia estimated that the country paid something in the region of \$20 million in 1968 purely due to price differentials above those available in the international market for the same products. The question of intermediate product overpric-ing m a monopolistic situation presents a basic difficulty.

Agam, in the case of the Columbian pharmaceutical industry, it was estimated that reported profits constituted a mere 3.4 per cent of effective returns, royalty payments amounted to 14 per cent of such returns, and "overpricing" ate up a staggering 82.6 per cent. Fortunately, this does not seem to be the case with the Jordanian pharmaceutical indu-

There is scope bere for the government to come to the aid of private industry by setting up specialised agencies to help the buyers of technology negotiate better terms. The government, if it has the qualified personnel, could provide local firms with valuable information on the process or product they are purchasing, so that they not be negotiating in the

Japan and South Korea have such governmental services.
One of the papers to be presented at the conference is by the president of the Korea Institute for Science and Technology (KIST) which provides consultations to private indust-

Mahmoud A Taha Ceranic Artist Tel. 669AB CERAMIC COURSE

Three-months course for four hours a week. 2) Six-months course for four hours a week. Contact Tel. 66940 Amman from 2:00 - 4:00 p.m.

Government role

The government can help rationalise the import of technology, according to Dr. Saket. The government can do this at three levels: providing consultancy services, through regulations or legislation to control the process or through active participation in negotia-

tions along with locel firms. Quite often private firms have to go through the government to obtain licences and to secure tax exemptions or other facilities. At such times, the government can stipulate that the firm adhere to certain procedures; for instance, it can advise the firm not to pay roya. lties in terms of a percentage of production or output or as percentage of profits,

There is also wide scope for legislation to secure more advantageous terms for the developing country.

The indigenous capability of developing nations can be subcontracted by foreign firms, at the insistence of the local government, to adapt imported foreign technology to local needs and conditions. The goveroment or firms hiring or contracting foreign companies can insist on a domestic counterpart to the foreign companies which will introduce an appreciation of local needs and circumstances and will allow Jordanian firms to build up a stock of experience and knowhow, as for example in the conduct of feasibility studies.

There is no reason wby Jordanian companies with the requisite skills, wherever available and even if partial, cannot be brought into the picture, to work hand in hand with the more experienced foreign companies in the process aquiring techniques which will allow for an increase in the value added locally in future projects.

No one maintains that Jordan should stop importing technology. The point is that imported technology should be suitable or adapted to local needs. There is a good deal of variety available in importable technologies. What

is required is intelligent choice, Japan, which is an industrial power to be reckoned with, to this day imports more technology than it exports. The key is exercising intelligent control and a detailed understanding of the technology being imported. Dr. Anani suggests that probably the right

place to look for Jordan's technology imports is Japan, Korea and countries in Southeas

"The technology there is probably more suitable to us. Triose countries have already passed through the stage of adapting Western technology to their needs," he says.

#### The RSS example

In Jordan, the outstending feature of the transfer and adaptation of technology has been cooperation with the industrialised nations, and it is the public sector that has taken the initiative and the lion's share in settling up the institutions and providing the funds to do this. The Royal Scientific Society is probably the best example of such coope-

Dr. Albert Butros, Director General of the Royal Scientific Society, says: "Here at the RSS we have been cooperating for a long time with West German personnel in the fields of mechanical engineering, industrial chemistry and low-cost housing. A good part of it is in the form of technical assistance, but another good part is also in the form of actual cooperation in research; which is what we want to strength-

A good example of the attempt to adapt technology to Jordan's needs is the soler energy station in Aqaba, which is primarily a desalinetion proje-

The West German government provided the major portion of the funds -- the rest came from the RSS, it is interesting that the grant was made jointly to the RSS and the West German Dornier- System Company. The two are doing research jointly. This is an example of cooperation rather than simple technical assistance.

Dr. Butros points out that Jordan is playing three different roles in the area of the transfer of technology. First, it is a receiver of technology. Second, it cooperates in reaearch science and technologydirected research with bodies outside Joroan, Finally, Jordan acts as a supplier of technical assistance and research capabilities to the region. It does not supply money, but it does supply technically-skilled man-"which in my mind, is even more important," Dr.

## is culmination of $1\frac{1}{2}$ a decree forming a steering committee with two basic func-

By Jenah Tutunji Special to the Jordan Times

How did the idea for such e conference originate? In late 1976, questions relating to the formulation of a science and technology policy for Jor-dan arose. Crown Prince Hassan started a series of meetings with local experts on the sub-ject. Dr. Y. de Hemptinne, Director of the Division of Science and Technology Policies, United Nations Educational, Scientific and Cultural Organisation, (UNESCO), Paris came on a working visit to Jordan to consult with Jordanian ex-

perts and offer his help. It was decided that activities ieading to a national policy for science and technology would be organised in a logical fashion. The first such activity was the May 1977 seminar on science and technology.

The May seminar reviewed ine status quo in scientific activities and organisations. It covered various sectors, including health, agriculture, water resources, industry and mining, research and the institutions of higher learning in the Kingdom, energy, and information systems.

The seminar, which met for five days, involved about 120 participants from the private sector, professional institutions, nublic sector organisations development experts, scientists and academicians.

The meeting served to clarify certain basic issues, such as the lack of a governmental institutional structure concerned with decision, planning, programming, control, coordination and finance in the area

of science and technology. It was pointed out that there was no national science and technology policy, and hence no plans for developing country's research capabilities in this area or to provide guidelines for institutions concerned with research and develooment.

The seminar also highlighted the financial, infrestructural and organisational difficulties facing research, and the fact that whatever work was being done was not sufficiently relevant to Jordan's developmental targets. It was recommended that a

major conference he held on science and technology.

Decree issued The prime minister issued

tions: to prepare for a national conference in February, and to prepare a national paper to be submitted to the secretary general of the United Nations conference on science and technology to be held late in 1979.

This week's science, technology

A 16-man steering commit-tee was formed, including members from the National Planning Council, the Royal Scientific Society, the two universi-ties, various government or autonomous agencies concerned with research or developmental planning and national resources, one representative of the Amman Chamber of Industry and another from the private sector,

This committee has been meeting once, often twice, a week since August 1977, and has issued the invitations for this week's conference. It has organised the conference and supervised the preparation of the five national papers to be presented.

Dr. Fakhruddine Daghestani describes the conference as a golden opportunity to combine the experiences of countries at various stages of development, each with its distinctive featu-

"It will be like putting them all in one pot and coming up with a new alloy. Such an experience no one -- not even ten experts -- can give you." All of the material available at the end of the conference will be excellent for the subsequent effort to formulate a policy, he says.

It should also belp create the will inside and outside Jordan to focus efforts on science and technology. The subsequent cooperation will be easier. The conference should boost bilateral, regional and international cooperation, and may serve as a model for future conferences in the region. There are plans to publish the papers read et the conference and the recommendations resulting from it.

Furthermore, in so far as the conference will recommend specific measures to be undertaken and help chart a path for the formulation of a future science and technology po-licy, it will automatically increase the likelihood of eliciting action from the government and decision-makers towards the adoption and execution of such

The potential is available in

Jordan, Dr. Daghestani says, It will take some time for a national policy on science and technology to bear fruit, but within five to seven years it should be a going concern.

years

#### international efforts

In addition to the local angle, there has been persistent prodding from the United Nations for developing countries to formulate national policies for science and technology. As has been mentioned, an inter-national United Nations Conference on Science and Tech-nology for Development (UNC-STD) is planned for late 1979 in Vienna.

Leading up to this, several regional and preparatory con-ferences have been held or are being organised on the subje-

The first preparatory regional meeting for UNCSTD was organised by the Economic Commission for Western Asia (ECWA) in Beirut, during Dec-ember 1977, which Jordan attended. Another is scheduled for July 1978, also in Beirut. A third preparatory conference not on a regional level, will be held in September 1978 in New York, Finally, there will be a fourth preparatory conference

scheduled for February most probably in Vienna. At the regional level EC is trying to organise the ts of its members, to draw tention to the priorities scientific and technological search and to drive home point that science and technological

preparation

logy are no longer sepan from the economic and ar development process. Each of the countries in Mideast region will bread and submit national paper ECWA, which will then pare a regional paper for CSTD. Each country in the gion will also prepare a natial paper for UNCSID, Joy is well ahead towards preing a national paper for

regional conference.

# Jimmy Carter's long Middle East ordeal

(Editor's note: The following is the full text of an article by Stanley Karnow in the Jan. 15, 1978 issue of the New York Times Magazine. The Jordan Times is reprinting it in full because of the interesting perspective it provides on the American position, and particularly that of U.S. President Carter, in the current Middle East peace-making efforts. Stanley Karnow is a Washington-based syndicated columnist specialising in foreign affairs.)

#### By Stanley Karnow

When Anwar Sadat's Egyptian jetliner touched down on Israeli soil last November, the diplomacy of the Middle East took its most dramatic turn in three decades. For the first time, the two principal protagonists in the region entered into face-to-face negotiations, and it was possible that the other Arabs might somehow be drawn into the process. Astonishing as the event itself, the hreakthrough had heen accomplished without the prior knowledge or even the behiod-the-scenes influence of Jimmy Carter, despite the enormous attention he had devoted to the Middle East since be entered office. He and his aides were surprised, even burt, and their feelings were reflected in the comment of the State Department specialist who referred to President Sadat and Prime Minister Menachem Begin as "unguided missiles" -- an admission that the United States had lost cootrol. .

That loss of control would he even more apparent during the weeks that followed -and it is evident today. Des-Carter's public expressions of optimism, one of bis senior advisers privately summed up the oervous mood in the White House when he told me: 'If these negotiations don't work out, it will be 20 years before Israelis and Arabs talk to each other again." For all its power, though, the United States appears to have heen reduced to an increasingly marginal role. Carter's advice bas been repeatedly spurned hy both Egypt and Israel, and his attempts to induce Jordan, Saudi Arabia and the Palestinians to cooperate have fared no better. He has lurched back and forth in a series of policy zigzags that have confounded the belligerents, perplexed many U.S. officials and antagonfsed a significant segment of American public opinion. The full story of the dip-

lomatic manoeuvers that have produced the present situatlon has yet to be related in every aspect. But at this stage, two elements seem plain. The administration, perbaps inadvertently, contributed to the current thaw in relations between the Israelis and Arabs that had been frozen in the vear hefore Carter entered office; despite their disagreements, they are at least discussing such formerly taboo subjects as the disposition of territory and the fate of the Palestinians. At the same time, however, Sadat's decision to deal directly with Begin seems to have punctured Car-ter's dream of hringing the Middle East parties together for a comprehensive settlement at Geneva. Questions are inevitable. To what extent has Carter been able to impose his will on the participants in the Middle East? Or has he, despite a tremendous investment of energy, been swept along by a momentum beyond his direction? And what, ultimately, are bls chances of steering the bostile peoples of the area toward

peace? Within the past three months. I have interviewed dozens ... Admiolstratioo officials, members of Congress, American Jewish activists, academic experts and Israell and Arah diplomats in ao effort, on behalf of The New York Times Msgazine, to trace the roots and calculate the possibilities for success of Carter's Middle East policy. Out of these interriews, the dilemma that has dogged the President throughout bis quest emerges in clean:r perspective.

#### CANDIDATE CARTER

#### AND THE PROMISED

#### LAND

Jimmy Carter has been trving to perform two incompatible roles. Mindful of the nation's global imperatives, he has sought to act as the honest broker between Israel and the Arabs. But domestic sentiment, the Government's commitments and his own feelings have consecrated him to the preservation of Israel's security. His mediation efforts have aroused periodic fears in Israel that he favors the Arabs; his need to reassure Israel has prompted the Arabs to doubt his impartiality. Thus his strategy, unfoiding erratically under these contradictory pressures, has provoked criticism from both sides. "I doubt," he tald a group of White House visitors recently, "that any foreign oegotiating

Before his race for the White House, Jimmy Carter had no special interest in the Mi-ddle East, and had visited Israel only once -- in 1974, as Governor of Georgia, io one those overseas junkets thhave became routine for American politicians. As the Presidential campaign gathered momentum and he fouod himself having to speak out on the Middle East, his proocuncements rarely deviated from the official Israeli line; many, in fact, were prepared for him by the American Israel Public Affairs Committa powerful pro-Israel lobby in Washington. He promised "unequivocally" to continue supplying Israel with economic and military ald, and he chided President Ford and

effort has ever heen attemp-

ted that is more complicated

more thankless and more fru-

Secretary of State Henry Kissinger for having withheld assistance in 1975 from Israel in order to Israelis into the a Sinai accord with Egypt. He denounced the PLO as "unrepresentative" of the Palestinians, and he pledged uphold Israel's claim to 'defensible borders" -- which, in the code language of Middle East diplomacy, meant that he backed Israel's claim to a major share of the occu-

pied Arab territories. These affirmations would return to haunt Carter in the White House, but at the time he was less concerned with defining a Middle East strategy than with winning American-Jewish votes. The traltional allegiance of American Jews to the Democratic Party had been eroding since the 1972 election, when a substantial minority of them cast ballots for Richard Nixon. Carter needed the Jews to win the big states, like New York. California and Illinois.

At about the same time, over at Columbia University, another contender for the top rungs of a Democratic Administration was addressiog himself to the Middle East problem -- from the opposite perspective.

Zbigniew Brzezinski, tapped by candidate Carter as a foreign-policy adviser and slated for a bigh-level post if Carter won, belongs to that breed of emigre scholars who have flourished in the United States since World War II. His accent, while softer than Kissinger's lends the same cosmopolitan verisimilitude to his manner but there the resemblance ends. A Roman Catholic of aristocratic origins whose father was a Polish diplomat, Brzezinski seeto advertise his antecedents by his severe brush cut and erect bearing, which give him the look of a retired cavalry officer. Certain American Jews, upset by his approach to Israel, would later hint darkly that his backgroand automatically made him anti-Semitic. Though he never alludes to it publicly and prohibits his staff from doing so, several of his relatives died the Auschwitz concentration camp, along with thousands of other Poles, both Catholic and Jewish.

Tha Middle East was not Brzezinski's specialty. He had done his graduate work at Harvard in East European studies. As director of the Trilateral Commission -- a bo-dy, sponsored by David Rockefeller, that had included Jimmy Carter among its members -- he was mainly interested in issues linking the Uolted States. Western Europe and Japan. But as an ambitious political scientist, he conot ignore the Middle Eauld st, and he had duly mada his academic contributions to the subject.

He was associated will a 1975 Brookings Institution report, "Toward Peace in the Middle East," even though he did not attend many of the meetings of the 16-member group that produced the study. The paper represented a consensus of widely differing views, but, in broad terms, it set forth ideas that would become the guts of the Carter

strategy. The report observed that. after promoting the Sinai deal between Israel and Egypt, Kissinger's step-by-step diplomacy had reached an impasse; it warned that unless diplomatic momentum was revived. the region's more moderate

eir radical foes. Another Middle East war, it said, would, among other things, disrupt the flow of Arab oil to the United States, Western Europe and Japan. Thus, "peacemaking efforts should benceforth concentrate on negotiations of a comprehensive settlement," to be built around three main points: First, the Israelis would

withdraw from the occupied Arab territories, with only such 'modifications" as would be acceptable to the parties to the dispute. Second, the Arabs would

recognize and respect the sovereignty" of Israel, and would progressively develop political and economic relations with the Jewish state.

Third, the Palestinian demand for self-determination would be satisfied through the establishment of either an independent Palestinian state or an autonomous Palestinian entity federated with Jordan -hut only if the Palestinians, too, recognized Israel's exist-

The report avoided any endorsement of the PLO hy sidestepping the question of how the Palestinians would be represented at the peace conference. But it called for Soviet participatioo, and it cautioned against any attempt by the United States to "lay down a detailed hlueprint of what it believes a settlement should be." That last blt of advice would be disregarded by the Carter Administration, with controversial consequences. In the summer of 1976, Brzezinski, now a name in the Carter camp, decided to improve his knowledge of the Middle East hy visiting Israel. The trip made him more sensitive to Israel's feelings of vulnerability, and he concluded that a future Palestinian entity on the West Bank and in Gaza ought to be demilitarized and associated with Jordan -- with, perhaps, security outposts retained by Israel during a transitional period. Oddly enough, one of the Israeli political figures who appealed to Brzezinski most was the hard-line opposition leader, Menachem Begin; their Polish background provided a hond. Brzezinski would later portray Begin as "a statesman who has had the unique privilege of struggling for the ideals of his people." Begin's accolade for Brzezinski, volcade privilege for Brzezinski, v ed to an Israeli friend, was less oratorical: 'He's a clever goy.

#### THE GENESIS

#### OF A POLICY

It is one thing to construct foreign policy models; it is another to devise an actual policy. At their initial postelection conferences, Carter, Brzezinski and Cyrus Vance agreed that the new Administration would have to adopt an active approach to the Middle East, along the lines proposed in the Brookings report, which Carter apparently had not yet read. But they also decided that Vance should tour the Middle East as soon as possible after the Inauguration to sound out the region's leaders and consider how their differences could be bridged. But portents of friction between the United States and Israel were already being fe-lt. Just before the inauguration. State and Defense Department officials leaked word that Israel had sold French Super-Mystere fighter-bombers equipped with American engines to Honduras, in apparent violation of United States law that forbids a country furnished with American military material to transfer the equipment to another country. Just after the Inauguration, the Administration, citing the same law, vetoed an Israeli plan to sell Ecuador 24 Israelimade Kfir fighter-bombers outfitted with American engines. A couple of days later, a State Department spokesman rebuked the Israelis for drilling for oil on occupied Egyptian territory in the Gulf of Suez; the operation, he said, was 'not helpful to efforts to get peace negotiations under way." Mora than that, Carter was reported to be ready to reverse President Ford's pro-mise to provide Israel with CBU-72's -- concussion bombs developed in Vietnam to destroy concrete hunkers and missile sites.

These gestures served as a signal to the Israelis and their American-Jewish supporters that Carter might not be as "unequivocally" committed to Israel as be had asserted during his campaign. Or, as a pro-Israeli lobbyist put lt: 'We could tell that he was headed in the wrong directi-

Nor did Cyrus Vance's Middle East tour turn up many signs of concord. The Israells and Arabs offered him divergent interpretations of the sort of peace that might follow a settlement, and they di-

leaders might be ousted by th- sagreed on the extent to Which Israel would have to evacuate the occupied territories. The Arabs generally favored a reconvened Geneva forum, mainly to prevent each other from seeking separate deals with Israel. The Israelis preferred a continuation of Kissinger's piecemeal approach, in the belief that they could make separate deals with the Arabs, as they had with Egypt on the Sinai. So Vance ended his journey with the predictable ob-servation that "there is a very hard and difficult road ahead." The trip's principal accomplishment was to set the stage for the region's leaders file ioto Washington for talks with the President him-

## **'OPEN - MOUTH**

#### DIPLOMACY

The first to arrive, in early March, was Prime Minister Yitzhak Rabin, and the visit was a disaster. Carter was brimming with confidence; Ra-hm was even more morose than his usual self. Weakened at bome by a rash of political scandals and the pre-election manoeuvers of some of his own Labour Party comrades, Rahin was hard put to make the concessions Carter considered necessary to generate momentum for progress. This "neg-ativism" exasperated the President and left him with the impression that it was primarily Israeli intractability that hlocked a settlement. And a series of diplomatic blunders on his own part served to worsen the strain.

Speaking extemporaneously at a welcoming ceremony on the White House lawn, Carter, for the first time as President, reiterated his campaipledge to support "defensible borders" for Israel -- thus appearing to underwitte
the Israeli refusal to relinquisb the West Bank, Gaza, the
Golan Heights, East Jerusalem
and large parts of the Sinal.
Rahin was elated. Within hours, however, Administration officials revised Carter's remarks. Fearing that the President's sloppy use of the controversial code phrase would infurlate the Arabs, they urged reporters to avoid a "narrow definition" of "defensible borders," and emphasized that the United States still stood by United Nations Resolution 242, which called on Israel to pull out of the occupied areas in exchange for "secure and recognized" boundaries. Nothing had changed.

Irked by this deflation of bis hopes, Rabin was alarmed a couple of days later when Carter said at a news con-ference 'that "stabilization" of the Middle Fast "would involve substantial withdrawal of Israel's present control over territories" and only "minor adjustments" of Israel's pre-1967 frontiers. Appearing on a New York television show soon afterward, Rabin assert-"without any qualification" that Israel "will not return" to its old borders. The episode had a stiffening effect on the Arabs as well. Sadat, speaking in Cairo, declared: We will not cede a single

inch of Arab land." Carter placated the Tsraelis, to a degree, by publicly defining his concept of peace as one involving a full range of normal relations between Israel and the Arab countries free trade, tourist travel. cultural exchanges and the like. But a week later, speaking at a town meeting in Massachusetts, the President dismayed Rabin again hy calling for a Palestinian "homeland." Months afterward, Brzezinski would explain to me that "homeland" had been intended hy the President to be a deliberately amhiguous word, signifying an area in which the Palestinians could live with "some stable sense of identi-ty." At the time, however, oobody knew what to believe. Israeli and Arab diplomats scurried around Washington, confused even further by advice from Administration officials to concentrate less on the details of the Preside remarks than on his overwhelming desire for peace. Suspicion flowered. As one diplomat said to me: "Half the people in the Carter Government don't understand the language of the Middle East. and the other half are trying to change it."

Voted out of office in May, Rabin would later attribute his party's defeat to having been put on the spot by Cardisclosure of the American blueprint for a final settlement; and other Israelis insisted that Carter had violated an understanding with the Ford Administration -- that the United States would 'coordinate" its Middle East

policies with Israel. Many American diplomats meanwhile were disturbed by what they had come to see as Carter's carelessness with sensitive diplomatic terms, and by his dismissal of nu-

anced phrases as "just semantics." State Department specialists were stunned by the President's disclosure of his Middle East program, which contradicted Vance's statement of only a few weeks earlier that the United States "should not come up with, or try to come up with, a specific plan." The specialists were concerned lest this "open-mouth diplomacy," as some of them called it, would invite rejections from Israel or the Arabs, or both, and thus thwart progress toward a Geneva conference. As one of these American officials put it: "There's probably a method to the madness. But I confess, all I see is the madness."

#### TILTING TOWARD THE ARAB WORLD

Next came the Arabs. Car-ter conferred in Washington,

in April and May, with President Sadat, King Hussein and Crown Prince Fahd of Saudi Arabia, and, after tha economic summit in London, he went to Geneva for a talk with President Assad of Syria. These sessions went smo-

othly, and seemed to have re-

inforced Carter's perception of

Israeli stubborness as the ma-

in obstacle to peace. This out-

look, though never put into

words, contributed subtly to

a growing impression that the

Administration was tilting to

ward the Arabs. Then, in ea-

rly May, a document from

toring was the President's zeal for his peace program -- a ze-al that sometimes carried him astray. At a May 26 news conws; the resolution calling for compensation was passed, al-so with American approval, in

Affairs, and it was handed to the State Department spokes-man, Hodding Carter 3d, just in time for his midday press briefing. "Don't send me out there with this paper," the spokesman pleaded. But he

Plainly designed to admon-ish the Israells, the stateme-nt skipped the usual bow to the American sense of commitment to Israel, emphasized the need for a Palestinian homeland without referring to a Jordanian link, and, replying directly to Begin, asserted that "no territories, including the West Bank, are automati-cally excluded from the items to be negotiated." Curiously enough, this White House inltiative had been launched without advance consultation wi-th Hamilton Jordan on its domestic impact, and there was immediate indignation within the Presidential political staff.
Officials assigned to Jordan's monitoring operation blamed the move on Brzezinski and the State Department "Arabists," and warned that it woturn American Jews against Carter in increasing num-

The warning was prescient. Whatever its foreign-policy merits, the move, in its domestic aspects, proceeded from a miscalculation -- the belief that because many American Jews were then in anguish over Begin's victory, they would waver in their support of the Begin Government when Israel's security was involved.
It is true that the American-Jewish community was apprehensive and divided over the prospect of a hardline Isracil regime headed by a man who had long been regarded by many of them as a fanatic. But, by coming down hard on Begin, the Administra-tion, to its surprise, closed the incipient breach. The backlash to the State Department declaration was immediate.
The White House mail was overwhelmingly hostile. Rabbi Arthur Hertzberg, president of the American Jewish Congress, told Brzezinski in a personal letter: "I am fearful that present policy may lead needlessly to confrontation with Israel and with its friends in the United States," And this only a month before Begin hi-mself was to arrive in Washington for exploratory White

House talks. Mindful of Rabin's disastrous visit four months earlier, Carter imposed a moratorium on official comments on the Middle East -- then broke it by inviting 40 American-Jewleaders to the White Hoto discuss their differences. Impressed though they were by the Cabinet Room setting, and the presence of Mondale, Brzezinski and Vance, the Jewish spokesman pulled no punches. "We come to you with grateful hearts," one of them said, "but our hearts are filled with fear."

Against this background Begin's two days of talks with Carter were, as Kissinger was to quip, "doomed to success." Carter avoided saying anything that could ruffle the conference, and Begin went out of his way to appear flexible. Cordiality and optimism filled the air. Carter agreed to sup-ply Israel with such military equipment as F-16 fighter aircraft and high-speed hydrofoil patrol boats. Begin bolstered the President's hopes for the convening of a Geneva conference as early as October, but he drew the line at PLO representation in any form, saying that the aim of the Pa-lestinian organization "is to destroy our country and to

destroy our people."

To Administration specialists, it was clear that there were two points in Carter's three-point outline that Begin would not accept -- major Is-raeli withdrawal from the occupled territories and creation of some sort of Palestinian homeland. The President, however, was determined to preserve the meeting's cosme-tic glow -- so much so that, week later asked about State Department charges that Begin had broken international law by legalizing three new Jewish settlements on the West Bank, Carter said, with gentle forbearance. "He, like myself, has run on campaign commitments. That doesn't mean that the settlements are right, but I think it would not be proper to castigate him un-necessarily."

#### ENDORSEMENT OF THE PLO

Having closely observed the Begin visit, the Arabs raised two objections. They refused to go to Geneva until Israel agreed, at least in principle, to withdrawai from the occupied territories and to the establishment of a Palestinian entity. And they insisted that the PLO be invited to the Geneva talks. Vance, returning to the region in August, found the Arab leaders adams nt on this score. Vance sided

publicly with them on the s tion of a pre-Geneva und standing, reasoning that " more that can be resolve (beforehand), the less likely ood that we will run into a ags and obstacles." At a same time, chatting with porters in Plains in his at diously casual style, Carter a
id the PLO "might particip
te" at Geneva if it adopt United Nations Resolution 2 -- if, in other words, it reco nized Israel.

This was the President's 1 rst, if conditional, endorse ent of the PLO, and his de sion to cross that line we prompted by two message from Vance -- that the Are would not consent to any e mpromise without a gestin toward the Palestinians, as that the Saudi Arabians he hinted to him that the PL might modify its opposition is israel's right to exist. But the President's move was, at b st, premature. Later, an A ministration expert would be me: "All we got out of the bid to the PLO was a dome tic headache that we dida
